RE: Operator's July 12, 1982
Response to Division May
3, 1982 Letter
Martin Marietta Cement
Limestone Quarry
ACT/023/004
Juab County, Utah

Dear Mr. Berg:

Thank you for responding to concerns brought up in the Division's May 3, 1982 letter. It appears to have answered the Division's concerns to a large degree. I would like to, however, clarify a few points for our records.

As stated in your July 12 letter, the waste disposal area has significant soil resources available.

- 1) What is the actual acreage involved?
- 2) When is it anticipated that disturbance of this area will occur?
- 3) Where will soil materials in this area be stored?
- 4) What is the rationale for the "short period" of storage of this soil material? Will this area be reclaimed at that time or will this soil be utilized in reclamation efforts elsewhere?

Also, it is stated that the approval revegetation plan will be employed to "for all reclamation work." We assume this means for stabilization of the current topsoil stockpile. If this is the case, when will this be accomplished? The Division recommends fall (October or November) seeding to take advantage of spring moisture.

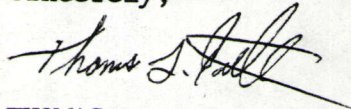

Finally, with regard to sediment control plans which "are being worked on"--have these been finalized and when will they be implemented?

The Division appreciates your cooperation in addressing our concerns and looks forward to your response to this letter.

Mr. Marvin L. Berg, P.E.
